Objective

I aim to secure an engaging web developer role within a dynamic and forward-thinking company, enabling me to leverage my technical and creative talents for the purpose of crafting and sustaining websites that are both responsive, user-centric, and visually captivating.

Skills & abilities

I proficiently utilize programming languages such as HTML, JavaScript, and CSS for front-end development, harnessing the power of Node Package Manager (NPM) with a focus on dependencies like SASS and the React library. Additionally, I have hands-on experience in building servers with Express using Node.js and working with MongoDB databases. I adeptly manage version control using Git for project repositories and employ Docker for containerized execution, ensuring streamlined and efficient project deployment.

Experience

FREELANCE ACTIVITY

Full-stack web developer | September 2023 – Now a days

- Built and maintained scalable and secure web applications.
- Designed and implemented custom CMS solutions to meet client's unique requirements, resulting in increased efficiency and user engagement.

Education

CEIBAL

JAP | Web development | March 2023 – March 2024

The frontend course covered HTML, CSS, JavaScript, Bootstrap for UI design, Git for version control, and Express.js for server-side development. It provided proficiency in MariaDB for effective database management, resulting in a comprehensive skill set across the web development stack. Students acquired the ability to create visually appealing websites, manage collaborative coding, and develop robust server-side applications.

CODERHOUSE

Express | Back-end | April 2023 – September 2023

Creation of backend servers with Express and NodeJS. Use of dependencies such as Passport, Nodemailer, Bcrypt, Mongoose, etc. Session management and connection to MongoDB database. Testing applications with Mocha, Chai and Supertest.

CODERHOUSE

ReactJS | Front-end | February 2023 – April 2023

Application of the ReactJS library for front-end projects in web development. Focused on ecommerce applications.

CODERHOUSE

JavaScript | Front-end | December 2022 – February 2023

Logic and operation of web pages. creation of ecommerce sites and landing pages using vanilla JavaScript.

CODERHOUSE

Web development | Front-end | October 2022 – December 2022

Web design and development, from the wireframe to the layout, paying special attention to responsive design.

Communication

Excellent communication skills enable me to collaborate with clients, stakeholders, and cross-functional teams to deliver high-quality results.

Leadership

Experience in personnel management, coordinate project tasks, and implement best practices to ensure timely delivery of high-quality web applications.
